VOL. XXXV, No. 17

DIDSBURY, ALBERTA, THURSDAY, APRIL 28, 1938

\$2.00 per Year. 5 Cents a Copy

Sell Saddle Horses to United States.

W. J. Fulkerth has this week sold four head of his Kentucky saddle horses to T. E. Taylor, of Great Falls, Montana. They were three chestnut fillies with white trim and a young chestnut stallion.

Mr. Taylor, the purchaser, is one of the big ranchers in Montana and runs a large herd of cattle and a big band of Belgian mares. He also purchased a mammoth jack from W. J. Fulkerth and three purebred Clydesdale yearling colts from Russell Fulkerth. The horses were taken to Montana by truck.

Mr. Fulkerth, who is the largest breeder of Kentucky saddle horses in Alberta, has recently sold a number of his horses which went to different parts of the province. Buyers from the U.S. have previously made purchases from this farm.

Protest Moving Highway from Towns.

Meeting to protest the exclusion of the towns of Carstairs, Didsbury and Olds from the proposed new highway between Red Deer and Crossfield, construction of which is slated to commence May 1st, citizens gathered at the office of C. E. Reiber on Friday night and decided to send a representation to Edmonton to protest against the present survey.

E. P. Foster, Didsbury M.L.A., over the telephone Friday advised that this meeting send a delegation to Edmonton. He promised to ask J. H. Ash and A. E. McLellan, M.L.A.'s for Olds and Innisfail, to co-operate with him in arranging a hearing for this committee and also to accompany the committee to Edmonton.

As a result, each of the towns interested, along with the municipal districts of Mountain View, Westerdale, Rosebud and Beaver Dam, asked to have delegates appointed to meet at the town hall, Olds, on Tuesday evening, April 26th.

No resolution or brief was prepared at the meeting, it being agreed to leave this to the delegates to settle at their meeting Tuesday night. The meeting, however, expressed the desire that the proposed highway run parallel with the railway track on the east side, and through each of the towns interested.

Those present at the meeting were J. H. Ure, R. Ruetcher, Carstairs; J. B. Wilks and Geo. Urquhart, Olds; Mayor Chambers, W. A. Austin, C. E. Reiber, H. J. Friesen, J. E. Gooder, Dr. Clarke, Roger Barrett, J. V. Berscht, W. A. McFarquhar and J. W. Halton. Weather prevented the delegates from Bowden and Innisfail being present.

On Monday evening of this week the council of the Didsbury Board of Trade met and discussed the proposed new highway.

They concurred with the action taken at the meeting held Friday night and decided to send a delegate to strengthen the representation that will be sent to Edmonton. Mr. Roger Barrett was appointed as the delegate to represent the Board of Trade.

On Tuesday evening the second meeting was held at Olds, with delegates from Carstairs, Didsbury, Innisfail, Bowden and Olds present, along with delegates from the municipalities of Mt. View and Westerdale.

It was definitely decided that a delegation with representatives from each of the towns concerned, and the municipalities, go to Edmonton to interview the government as soon as appointment could be made with the Minister of Public Works.

It was decided that each town should present its own case to the Department, with a unified brief setting forth a request that the highway should follow the railroad as near as practicable, so that each town should be served.

Local delegates appointed are: C. E. Reiber and J. V. Berscht (Town), Roger Barrett (Board of Trade), N. S. Clarke (Westerdale M.D.) and A. Brusso (Mountain View M.D.).

One Dollar per year will make you a member of the Red Cross. Hand your membership fee to the local secretary, Mr. W. A. Austin, or send it to Lt.-Col. D. H. Tomlinson, Commissioner, Alberta Division, Canadian Red Cross, 17 Customs Building, Calgary.

Why All the Fuss?

We wonder why all the fuss is being made about the new \$4,000 Buick limousine fitted up with all the gadgets, including cigarette lighters, which has been purchased for Premier Aberhart.

The Government House, it is reported, is to be closed this week but the dignity of the province must be kept up. Surely more people will be able to see the car as it travels around the province. They would have to go to Edmonton to see the Government House.

W.M.S. Meeting.

Miss Evelyn Mitchell, travelling secretary of the Women's Missionary Society for the Dominion was the speaker at a meeting held at the Knox United Church on Tuesday afternoon when in a wonderful address she spoke of the work of the W.M.S. both at home and in the foreign field. She also described the work in connection with the hospitals. In speaking to the young people of the C.G.I.T. and the Mission Band she stressed the need of more workers.

The meeting was in charge of Mrs. J. Boorman, president, assisted by Mrs. N. S. Clarke, vice-president and the devotional exercises were conducted by Mrs. D. M. Sinclair.

A solo was rendered by Mrs. D. Edwards; two numbers by the junior choir; and a short play "Ten dimes make a dollar," by the Mission Band.

The meeting was well attended by members and visitors from Westcott and Westerdale, the C.G.I.T. and the Mission Band.

Alberta Observes Arbor Day May 2

Arbor Day will be observed Monday, May 2nd, in Alberta this year. Acting Premier Ernest C. Manning announced at Edmonton. A previous dispatch which said the day (which is not a compulsory holiday) would be observed May 23rd, was incorrect.

Obituary.

CHARLES EDWARD YOUNGS

Charles Edward Youngs, one of the older settlers and best known farmers of the district west of Didsbury passed away, in his 64th year, at his home at Melvin on Monday, April 25th.

Born at Embro, Ontario, on May 20th, 1874, he was married to Emma Catherine Ross at Embro in 1904. They came west in 1905 and settled 7 miles west of Didsbury, where he resided up to the time of his death.

Coming here when the settlement of the country had just commenced, Mr. Youngs did his part in the development of the district. For many years he was a trustee of the Melvin School District, was a faithful adherent of the Westcott United Church and was always interested in public affairs, lending his hand in all projects for the good of the community. He was widely known for his hospitality and genial manner and acquired a large number of friends and acquaintances who will sincerely regret his passing and sympathize with his sorrowing wife and family.

He leaves to mourn their loss, his wife, one son, Ross, and one daughter, Dorothy. He is also survived by three brothers, William, of Embro, Ont.; Thomas, of Sacramento, Cal.; and George, of Didsbury; and two sisters, Mrs. Edwin Land and Mrs. Robert Herron, of Thamesford, Ont.

The funeral services were held at the Knox United Church on Wednesday afternoon, Rev. J. R. Geeson conducting the service. The interment took place at the Didsbury Cemetery.

The pallbearers were F. W. Leeson, C. G. Carlson, A. F. Cowitz, W. N. White, J. A. Adam and N. S. Clarke.

The arrangements were in charge of the Durrer Funeral Home.

Knox United Church Notes.

The services next Sunday will be in charge of the minister, who will preach on the theme, "Sight for the Blind." A cordial invitation to all.

Medal Contest.

The Junior Medal Contest held by the Didsbury W.C.T.U. last Friday evening at the United Church, was participated in by a number of both elocution and musical contestants.

This interesting evening was due to the efforts of the boys and girls who took part, to Mrs. Gerson who arranged the program, to Miss Alma Shaw who assisted in the training of the contestants and to those who so kindly gave assistance in the musical numbers.

Thanks are also due the judges: Miss Hazel Ray, Mrs. Stevens, Mrs. Gulliver, Rev. A. S. Coughell and Mr. C. R. Ford, whose decision gave to Nora Barrett the medal for the best musical number, and to Margaret Phillipson the medal for the best elocution number.

Biting The Hand

There will be few Canadians, in Eastern Canada as well as in the West, who will quarrel with the suggestion that some means should be found or devised to prevent people who have amassed great wealth in Canada from escaping taxation and succession duties by moving to other countries.

There is no suggestion, of course, that the super wealthy should be prohibited from leaving Canada to reside elsewhere should they choose to do so, but it is proposed that some measures should be enacted to require these people to contribute their just share towards the cost of government of the country which has made their wealth possible.

Evasion Obligations

The discovery that there are people who have made considerable wealth in this country and are seeking to avoid their obligations by retiring elsewhere and taking their wealth with them was revealed during discussions in the House of Commons, during which debate the suggestion was made that something should be done to prevent this evasion.

As the Editor of the Western Retailer, official organ of the Retail Merchants' Association in the prairie provinces said in the March issue: "Taxpayers must have been interested when attention was called in the Federal House to the fact that a number of Canada's super wealthy were leaving Canada to reside in the West Indies—to enjoy the climate, the scenery, and quite incidentally, to escape taxation. There was a request for legislation to make it impossible for migrants of this kind to escape taxation. No doubt that phase of the subject will be considered further."

As the same writer appropriately comments: "The question as to who should pay the most taxes arises. Surely the super rich should not be evaders. There are many such in Canada and in the U.S.A. who could pay half their income in taxes and still be unable to spend the other half. Yet recent disclosures have shown that they are the very people who, under skilled and no doubt highly paid advice, do evade taxation, succession duties and so forth."

Hard On Poorer Taxpayers

It is bad enough for the Dominion and the Provinces to have to lose their rightful and legal income from such sources, but what is worse is the fact that the delinquency of the rich, who by such means escape their obligations, entails severe loss upon the remaining and necessarily poorer taxpayers who are obliged to remain in the country and who can ill afford such additional burden.

The principal point is that those who have become wealthy because of the facilities and opportunities afforded them by the country of their nativity or adoption, as the case may be, have a moral obligation to assist in supporting that country and the people—their neighbors—who have assisted them in creating a fortune for themselves and their families. If they choose to elude this obligation it is not going too far to say that they are willing to bite the hand that fed them.

Where Is Patriotism?

As the Western Retailer says: "It is disheartening to the struggling business taxpayer to read of these things, knowing that he must pay for their evasions. The wealthier a man is, the greater his responsibilities are and the finer and cleaner the example he should set for the rest. Singing 'O Canada' does not necessarily make a man a patriotic citizen or even a good one."

The revelations recently made in the House of Commons do, however, raise in the minds of many, another aspect of the question and that is the burdensome taxation from which all the taxpayers of the country, rich and poor alike are suffering due to over-government which in turn is caused by the existence of too many taxing governmental units for a country of comparatively sparse population and wide extent.

Fact finding bodies and organizations have established without fear of contradiction, that the people of this country are over-governed and it is to be hoped that some of the recommendations which have been made to the Rowell Commission on Dominion-provincial relations in an effort to remedy this condition and relieve the taxpayers of some of the excessive costs of government, will be given very serious consideration.

Worthy Of Consideration

Included in these recommendations are proposals for more centralized government, for the merger of some governmental units as well as for more equitable distribution of taxing rights and elimination of much overlapping which must necessarily result from a multiplicity of tax levying bodies.

All of these proposals and possibly others which have not been made direct to the Commission merit pondering and efforts should be made to reduce the tax burden on rich and poor alike if the people of the country are to be given an opportunity of again enjoying a reasonable measure of prosperity.

The fact, however, that the country is over-governed and over-taxed does not relieve those who have become wealthy in this country from their moral, if not legal obligations, to do their part in paying for the cost of government.

Swanscombe, in Kent, England, is the only town in Great Britain with a population of 5,000 without either a general post office or bank.

The ages of 20 to 25 are the most expensive ages to insure companies in England.

Washington, Madison, Jackson, Polk, Buchanan, and Harding were the only American presidents who had no children.

Some attendants at the British Industries Fair in London speak eight languages.

The Pioneer Spirit

Peace River Homesteader Starts A Puffed Wheat Factory

The pioneer spirit of enterprise remains keenly alive in the Peace River country. A. Rogers, homesteader, assisted by J. Tate, high school teacher, have started a puffed wheat factory on Mr. Rogers' homestead at Wanham. Made from Garnet wheat, which has proved to be as good variety as any for this purpose, their product is in growing demand.

The primary purpose of the venture, when a suitable and a central location is found, is to provide opportunity for pioneer young people to work their way through high school. The support these two men are receiving indicates that their purpose will be realized before many months.

At Driftpile, in Lesser Slave Lake area, Martin Dofner, farmer, has added a tannery to his activity. He is producing leather and also makes harness.

Boys' Club Was Thrilled

King George Delighted Members By Attending Boxing Finals

The arrival of the King at the Albert Hall recently to see the Boxing Finals of the Federation of Boys' Clubs was thrilling. It was the first time that a King of England has attended an amateur boxing championship. He arrived just as the third and last round of a contest was beginning and stood in the doorway so as not to disturb the boxers. Then came a tremendous roar of welcome as, accompanied by the Duke of Gloucester, he walked down the staircase to his seat at the ringside.

TESTED RECIPES

LUNCH AND SUPPER MENUS

Simple menus and easily prepared dishes are something every housewife is looking for. There are times when you want to fuss up and spend time on meals, but that is only occasionally. For day in and day out purposes, unadorned, but tasty and nourishing meals are what the family needs and the cook wants.

Here are some selected luncheon and supper menus which fill the bill perfectly. They are chosen for their simplicity, tastiness and variety. On Fridays when, just for a change, you want something that's neither meat nor fish, you'll be glad to have a choice of these three menus which are built around one delicious salad.

1
Buttered Asparagus on Toast
Stewed Tomatoes
Layered Cheese and Apple Salad
Prune Whip

2
Tomato Soup
Whole Bran Muffins
Layered Cheese and Apple Salad
Pineapple Ginger Snaps

3
Spanish Omelette
Baking Powder Biscuits
Layered Cheese and Apple Salad
Grapefruit

Layered Cheese And Apple Salad

1 package quick setting lemon jelly powder
1 pint warm water
2 tablespoons lemon juice
1 teaspoon salt
1 red apple, cut in 1/4-inch dice
1 teaspoon sugar
1 package (3 ounces) cream cheese

1/2 cup walnut meats, broken
Dissolve jelly powder in warm water. Add 1 tablespoon lemon juice and salt. Chill. Combine apples, sugar, dash of salt, and remaining 1 tablespoon lemon juice. When jelly is slightly thickened, fold apples into half of jelly mixture. Turn into mold. Chill until firm. Beat remaining jelly with rotary egg beater until of consistency of whipped cream. Fold in cheese and nuts. Pour over firm first layer. Chill until firm. Serve in squares on crisp lettuce. Garnish with mayonnaise. Serves 8.

Plans are reported to be under way for a railway, 2,500 miles long, to provide a 67-hour service between Chungking, China, and Soviet Russia.

Working Toward Her Goal

Germany Aiming For "Der Tag" And Intends To Win

Once more Germany is arming for "Der Tag" and this time she does not intend to be on the losing side.

She has drawn blueprints for what may turn out to be the most powerful war machine in Europe, and as fast as factory wheels can turn, those paper plans are being transformed into ships, tanks, airplanes and forts.

In the next war Germany's battle front will be as deep as the nation. Women will be subject to conscription under the Defence Act. Every wheat bin, dairy, brewery, electrician's shop and even farm animals will be part of the army.

Ludendorff, in his grave, no longer counsels the German general staff out of his experiences in the World War, but one idea he offered them persisted. It is the idea of "total-krieg"—totalitarian war—in which every unit of the nation almost down to babies is considered in the light of its military functions.

For example, Germany must not think of a horse as an animal that pulls a plow or can be ridden to hounds, but in terms of hauling a gun carriage or carrying a cavalryman.

Foreign observers say that there now has been accumulated a secret war chest of 1,000,000,000 reichsmarks in gold. Mobilization has been worked out to the most minute detail and civilians as well as army reserves will know exactly where to go and what to do when war starts. One phase of her military preparation that Germany cannot keep secret is the elaborate system of "autobahnen", high speed federal highways along which troops can move with a speed hitherto unknown to the military mind.

Seeking New Treatment

Snake venom and vegetable compounds will be enlisted in the war against dread infantile paralysis in experiments by Dr. John A. Kolmer, Philadelphia scientist. Otto Vogt von Sickingen, scientist and explorer, will lead an expedition into Brazil soon to collect necessary venom and vegetable compounds.

Elimination of slums in all large cities is planned by South Africa.

Commission Report

Some Of The Recommendations Of National Employment Inquiry

Following are some of the high-light recommendations of the National Employment Commission:

Examination by the Royal Commission on Dominion-provincial relations of the financial and constitutional possibility of the Dominion assuming the administration of unemployment aid.

The need for federally-subsidized low cost housing plan, with care being taken to make sure itself benefits go only to the intended low-income group.

Creation of an advisory national committee on the tourist trade and measures, such as the promotion of native handicrafts, to make the tourist trade even more profitable than it now is.

Examination of the possibility of allowing income tax exemptions on expenditures made for the replacement of obsolescent machinery and equipment in industry, this to promote low-cost production for the retention of export markets.

Establishment of a special labor department bureau for research in connection with the employment of women.

Modern Geography

The Detroit Free Press claims that the automobile has taught Americans geography. Some of them, says the Toronto Star, have, at any rate, learned to their sorrow that an east-west highway, for example, is bounded on the north and south by ditches and telegraph poles, and governed by motor cops.

Apprenticeship for farmers similar to that for professions has been introduced in Germany.

Underground Streams Are Located Which May Solve Prairie Water Problems

Subterranean streams which flow far beneath the earth's surface in glacial channels carry off much needed precipitation in semi-arid districts of Saskatchewan but may solve the serious water shortage problem which has developed.

T. C. Main, water resources engineer of the Canadian National Railways for western region, told geology professors and students at the University of Saskatchewan about steps taken to overcome water shortage and said that experimental projects at Humboldt and Watrous already had proven eminently successful.

"Seventy-five per cent. of the people on the western plains are using water that is not fit for human consumption," Mr. Main declared during his address.

"It may not be hurting them," he went on to say, "but in this age it is not good enough, especially when there is such an abundance of excellent water available." Precipitation on the great plains made it a semi-arid area, he said. In addition, there was a minimum of rivers, and lake water was quite bad as a rule. The deep ground water of the prairies was hard and contained too many salts.

Mr. Main dealt with the efforts of the C.N.R. to obtain satisfactory water supplies in areas not easily served. His remarks were quite applicable to the domestic conditions of towns and cities as well as farms, and to small-scale irrigation requirements, he said.

In 1920 the railway was faced with a severe water crisis. It found that in many locations it was necessary to catch the water before it soaked into the earth's crust, if it was to have it at all, so dams were built in coulees. The water in the ground was not at all suitable in these areas, so the dams were constructed only in places above the ground-water level. The railway collected water from the spring run-off and from heavy rains, and there was no infiltration from below. The water was of good quality, the speaker said.

Fifty-six of these dams were built in 10 years. Many held water over three years, the water 40 feet deep in places. Many methods of construction were used, including concrete and wood. At the present time all but three held water.

Shortage still prevailed, Mr. Main continued. A method of obtaining water from the quicksand under a surface layer of clay was discovered by an American engineer only recently. The sand, in this particular type of well, was pumped out and gravel put in its place. The sand particles were held in suspension only so long as the water moved at a certain rate, he said, and gravel was continually inserted until a big enough reservoir was created for the required rate of pumping.

The third method outlined by Mr. Main promised to revolutionize the whole water situation on the prairies. Operations in the Humboldt, Watrous, and Nokomis areas gave him cause for unbounded optimism.

"Humboldt was running short of water—and it was good water in the first place," he said. "The deep wells had dried up, and the C.N.R. was faced with a shortage. We got permission from our chief engineer to experiment on a new theory we had."

Shallow glacial deposits of sand and gravel on a bed of heavy clay showed no water on the top of the clay, he asserted. An annual rainfall of 12 inches on an acre of land would yield a quarter of a million gallons. "Where did it go?" was the question. Gravel land carried little vegetation and there was slight evaporation, so not much was lost in the air.

The theory was that channels or troughs were scooped out of the clay during the glacial age, and the water ran into these. After a considerable period of no success in the Humboldt district, a channel was located and traced for three miles. There was a depth of 20 feet of water, 30,000 gallons a day going through the sand and gravel. This was in October of last year, so the operations were not yet completed.

A similar condition developed at

Watrous. The C.N.R. got its water from the town, and it was of such poor quality that it earned the name of "liquid dynamite" among trainmen. A satisfactory plant was put into operation there on Feb. 1.

The big surprise was left for Nokomis. "A billion gallons of the best water between Winnipeg and Edmonton, including Saskatoon, was just a few feet under the ground," Mr. Main said. He obtained a requisition of \$85,000 to develop the scheme.

Sections three and four of township 30, range 23, west of the 2nd, were examined in detail by Mr. Main's party. Under 722 acres, it was estimated, 218,000,000 gallons of water flowed yearly. A thousand acres were tested, and then 8,000 acres indicated a similar condition. Only 20,000,000 gallons annually are needed by the railway. "There is enough first-class water there for a city like Saskatoon," the speaker said. "And there must certainly be similar prospects elsewhere. These three places needed water and we were able to find some. We have not tried elsewhere."

Value Of Personal Liberty

Was Very Clearly Demonstrated By Judge In England

A prized possession of democratic countries is the liberty of the subject. A recent High Court case in Britain illustrates effectively not only the value placed upon personal liberty by the British, but also the balance which is struck between the forces of law and order and the individual.

The facts of the case are simple. Mr. John Patrick Ludlow, actor, was waiting for a bus. He was wearing a thick coat and he had over his arm a thinner coat which he was taking to his tailor to be pressed. Mr. Ludlow was arrested by two plainclothes policemen and marched to the local police station, on suspicion of having stolen the second coat.

Mr. Ludlow brought an action against the police claiming damages for false imprisonment. His version of the facts was accepted by the jury who awarded him £300 damages with costs.

It might seem at first sight that this was an extremely unimportant action, almost a waste of time. But true democracy is really an expression of small liberties, and this case has its important aspects. As the judge in the case, Lord Hewart, observed: "If once we show any signs of giving way to the abominable doctrine that because things are done by officials therefore some immunity must be extended to them, what is to become of our country?"

In Britain the police are not the law. They are citizens with special powers, but they are subject to control and must use their special powers discreetly. In some ways this hampers them in their fight against crime. But it also acts as a most effective shield in the fight to safeguard individual liberty. Christian Science Monitor.

Crowd Was Hungry

People At Grand National Race Consumed Large Quantities Of Food

The London, Midland and Scottish Railway Company served 16,000 meals to the Grand National crowds. After the race was over there was little left of:

2,500 pounds of fish; 1,700 rashers of bacon; 8,300 eggs; 5,400 pounds of meat; 750 grapefruit; 150 hams and 6,500 bottles of beer.

One railway company alone took 34 trains of racegoers to Aintree. All arrived at the one station within three hours.

For the first time police planes directed traffic from the air by wireless.

May Be Explanation

Science has not been able to explain satisfactorily just why some lightning flashes show up black when photographed. The only explanation so far, is that the wave length of the light causes the unusual chemical reaction.

Necessary For World Travel

Dates Change At Imaginary Line From North To South

The international date line is an imaginary line from the North to the South Poles, at which dates change.

The necessity for such a line, in these days of general world travel, may be illustrated by the imaginary case of a traveller who leaves a certain point at 12 o'clock noon on Monday, and travels westward round the globe, keeping pace with the sun.

This speedy traveller would arrive at his starting point at noon on Tuesday, with the sun directly overhead the entire 24 hours of the journey. The question would be where did he leave Monday and enter Tuesday?

The answer would be that the date became later by one day upon his crossing of the international date line. This line is located approximately at the 180th meridian.

The international date line is not straight from pole to pole. It starts down the 180th meridian from the North Pole, jogs east of Wrangel Island, passes between Alaska and Siberia, and thence angles west again past the 180th meridian, returning to the meridian approximately opposite Vladivostok. The date line then drops down the meridian to the equator, where it makes its last eastern jog, rejoining the meridian permanently at the Antipodes Islands.

This jogging of the date line is for the purpose of keeping it at sea so far as possible, where traffic is least likely to be disturbed or confused by the change of date.

Wheat Rust

Plague Of Prairies Now Being Conquered By Aid Of New Resistant Varieties

Wheat rust, prairie plague, is near being conquered, Dr. L. H. Newman, Dominion cerealist, told the house agriculture and colonization committee.

Three to five million bushels of seed of rust-resistant wheats will be available this year, he said. It will be sown chiefly in Manitoba and eastern Saskatchewan.

"After this year there will not be much excuse for sowing varieties susceptible to rust," he said.

A film, distributed by United Grain Growers, Limited, produced with the co-operation of federal and provincial government, showing the work being done to defeat the disease that plagues not only wheat in the west but oats in the east as well was shown.

Great care has been taken that no varieties unacceptable to the grain trade have been distributed.

"We use Marquis as the standard of quality," said Dr. Newman. "Actually we have developed a number of varieties that seem to have the edge on Marquis." He predicted that in eastern Canada the new rust-resistant wheat varieties would replace Marquis and Huron, the present stand-bys.

Each of the great animal divisions of the world has a different covering material. Mammals have hair, reptiles have scaly skin, fish have scales, insects and mollusks have shells and birds have feathers.

Facts About Tornadoes, That Cost Yearly Many Lives And Much Property Loss

Early Printing

Study Of Technique Of Art In The Early Sixteenth Century

The King has presented to the Victoria and Albert Museum, South Kensington, two documents which are of great value for the study of the technique of printing in red and black in the early sixteenth century.

The first is what is known as a frisket-sheet—a protecting sheet of parchment backed with paper, in which holes were cut to allow the printing of initials, or words, which were to appear in red. The second is the proof of a page printed entirely in red which shows textual corrections and on which those words which are to be left in red in the final printing are marked with the pen. The book to which this proof belongs (a Book of Hours printed by Regnault, of Paris, in 1535) is already in the library of the museum, and shows the marked words duly printed in red, whereas the remainder of the page is in black.

The importance of the King's gift is that it furnishes for the first time proof of what has only been surmised before—the method of printing in black and red at this period. It is now clear that the whole of the type was inked in red for the proof. Then a frisket-sheet was cut which allowed only the selected initials and words to touch the paper. Finally the type for these words and letters was taken out, and the gaps were filled with leads, and the remaining type was cleaned, re-inked with black ink, and printed off a second time to complete the process.

Both these documents were found, with others, among printers' waste used as padding inside an old binding in the Royal Library at Windsor.—London Times.

Ex-Miner Keeps Fit

Takes Fifteen-Minute Walk Barefoot Every Day In Year

For 27 years or more, winter and summer, Oren (Ginger) Young, Midland, Michigan, has been taking a 15-minute walk barefoot daily. And in all that time he never has been ill a day.

"Apples, tomatoes and humans need air," Young explains. "Put apples in a hot room without fresh air and they rot rapidly. Give them air and they keep good for a long time."

One of Young's stunts, which sometimes amazes visitors to the town, is shoveling the snow off his front walk while barefooted and dressed only in light shirt and trousers.

"Of course, I wear an overcoat and protect myself from the cold like other folks, but not during my 15-minute daily airing-off period," Young adds.

Young, 59 years old, believes one reason he values fresh air so highly is that he spent his youth in the coal mines where fresh air just doesn't exist.

Rights Of Witnesses

Suffers From The Badgering Of Clever Lawyers

The most helpless person in any court of law is the witness. He seems to have no friends and suffers from clever lawyers, unsympathetic judges, strange surroundings and usually nervousness. Probably that is why evidence cannot easily be procured to promote the ends of justice. Apparently in Australia there is a judge whose protection of witnesses has got him in the newspapers. His action was so unusual it was news. When a witness in the divorce court at Sydney was being badgered by a lawyer he scratched his head and the privileged lawyer took advantage of the peculiarity. He was told by the cross-examining attorney to "take your hand from your head." Judge Boyce said, "Leave it there if you want to."

To the attorney the judge said: "I believe in witnesses being at their ease. If a man wants to scratch his head, he may do so. If he wants to fold his arms, he may. In fact, within reason, a witness may put his arms anywhere. Many attorneys insist on witnesses looking at them. Witnesses may look where they like. Another question often put is 'What are you laughing at?' when a witness smiles. A witness is perfectly entitled to smile if something funny happens to amuse him."—Brandon Sun.

The World of Wheat

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

"I intend to seed ten acres of my best summerfallow with 1st Generation Registered wheat," said a farmer to me recently. "Can you give me a few hints on sowing and taking care of this field?"

"Gladly," I said. "First clean out the seed drill thoroughly and scrape off the mud from the discs or hoe drills."

"Be sure the seed, after treating for smut, is poured from the sacks straight into the drill box, so that it will not become mixed with other kinds of grain."

"As the seeder arrives at the edge of the field to be sown, scrape the mud or dirt from the tires and spokes of the wheels, and clean out the horses hoofs, because this dirt often contains a good deal of other grain."

"Sow the field carefully, leaving an alleyway about three feet wide around it, or instead, if you desire, circle the field with a drill-width of oats; then cut these oats for green feed after they head out."

"Special care, too, must be taken in threshing and harvesting, but I will tell you about that later."

"But this is a lot of extra work, Mr. Strange, isn't it?"

"Yes it is," I replied, "But don't forget that extra work is the price we ever have to pay in life to gain an extra reward."

Following factors have tended to raise price: Frost damage reported in Oklahoma and Texas -- Cereal deficiency in Austria -- Balance of Roumanian exportable wheat surplus of poor quality -- Moisture supplies deficient over parts of North Africa -- Belgium buying Russian American and Argentine wheat -- European domestic supplies reduced -- Expect northern Italian crop will be a failure.

Following factors have tended to lower price: Rains in Australia -- Seeding starts in Western Canada -- Less tense political conditions throughout Europe -- Rains over large areas of Balkans and Hungary -- Prospects of increase wheat acreage in Argentina -- Germany mixing large proportions of corn and potato flour with wheat flour.

Items of Interest

Railway officials are looking forward to the busiest tourist season in the past five years. Reservations ranging from individuals to parties of 200 have been received by Ernest Officer, C. P. R. special passenger agent at Calgary, running from June 1st to the latter part of September. Advance bookings have only started, "Compared with last year, there is a large increase." To handle the extra flow of traffic, part of the summer railway schedule went into effect this week.

WEEKLY SERMONETTE

"Reason," like Zacheus, is of a low stature and cannot see the promise. We must ascend by faith, then and not until then will the soul see Jesus.

Home-Mixed Feeds for Young Chicks

A saving can be effected through the use of home-mixed, farm-grown feeds for rearing chicks. Finely ground wheat, oats, and barley, supplemented by meat meal and other purchased concentrates makes a very satisfactory and economical ration for young chicks. Such a ration has given good results at the Experimental Farm, Brandon, during the past six years. The mash mixture supplied to the chicks in self-feeders during the first four weeks is made up of the following ingredients:

Sifted ground oats or ground hullless oats 40 pounds
Sifted ground barley 40 "
Ground wheat..... 40 "
Meat meal (60% protein).... 20 "
Bone meal..... 2 "
Fine charcoal..... 3 "
Fine salt..... 12 ounces
Cod liver oil..... 2½ pints

This mixture has promoted rapid growth, and the total mortality during the brooding period has averaged less than 5 per cent for the past six years. The cost of this mixture on the basis of 1937 market prices was \$2.05 per 100 pounds.

Care must be exercised to insure the ingredients are thoroughly mixed. The cod liver oil in combination with a very fine meal has a tendency to form lumps. To insure an even distribution, the oil should first be mixed with the ground wheat. The bone meal, salt, charcoal, and meat meal should be thoroughly mixed together and then added to the ground wheat and cod liver oil. The final step should be to add the ground oats and barley and continue to mix until an even distribution of the different ingredients has been effected. Meals containing cod liver oil will become rancid when kept too long in a warm place. The meal should be kept in a cool place, and not more than a 2-weeks' supply mixed at one time.

Young chicks during the brooding stage require approximately 1½ pounds of mash each. In addition to the mash a small amount of cracked wheat and rolled oats can be fed to add variety. At the Experimental Farm, Brandon, water is supplied the young chicks for drink during the first ten days, and after this time buttermilk is supplied. After the chicks are four to five weeks old the amount of meat meal included in the mixture is reduced, and the ground oats and barley are not sifted. After the young chicks are out of doors for a part of each day in the sunshine, the cod liver oil is left out of the mixture.

Burnside Notes

Mrs. Charles Mardon spent Friday afternoon with Mrs. Joe Clarke.

Mr. Fred Metz was a Sunday evening visitor with Mr. B. Woode.

Miss Annetta Sheila, of Calgary Normal School, is doing her practice teaching this week at the Poplar Creek School.

Mrs. N. Eckel, Robert Eckel, Miss Evelyn Charlton and Mr. Dick Metz were Sunday visitors at Mr. Hugh McLean's.

Mrs. Kate Saunders and daughter Julia, of Calgary, who had been spending the Easter vacation with Mr. and Mrs. W. Saunders here, have returned to the city.

Good, roomy work shirts for men, 85c up. See them at T. E. Scott's.

Mountain View Notes

Mrs. Bennie St Clair was a recent visitor to Drumheller.

Mrs. E. St. Clair and Miss Eileen St. Clair were Calgary visitors recently.

The many friends of Mr. and Mrs. Ed Barnes will be pleased to know that Mr. Barnes is recovering nicely from his lengthy illness.

Miss Ethel Bruce spent the past week with her sister, Mrs. 'Scotty' St. Clair, at Sylvan Lake. She said that the water was fine.

Mountain View W.I. met for April with Mrs. Basil Atkinson on the 21st. "Amateur Night," which was previously postponed on account of an epidemic of measles, will now be held Friday, May 20th. Mrs. Mac Woods gave an interesting paper on "Handicrafts." The May meeting will be held at the Hall on Thursday, May 19th. Members are requested to come equipped for house cleaning. Mrs. Bennie St. Clair will speak on "Household Economics." Following the business session the hostess served lunch to conclude a pleasant and profitable meeting.

Bergen Notes

Mrs. Levi Barker had a bad fall and injured her face and lips.

Mrs. Edwin Clark returned to B.C. having visited here with her parents and friends.

Mrs. John Mjolsness has returned from Innisfail where she visited her daughter Adeline.

Miss Minnie Halvorson is home from Red Deer, where she had been attending Bible school.

Marie Erickson who had attended Bible school at Didsbury, is helping Mrs. Alex Robertson at Westcott.

Jean Admussen is home from Bowden on a vacation. Gladys takes her place at Bowden as long as Jean is here.

Dick Metz was here a few days ago, renewing acquaintances and also probably longing for a job in a jack pine saw mill.

The Bergen post office has been moved to J. J. Davidson's place at the Fallen Timber bridge. The mail comes via Sundre on Mondays and Fridays.

Walter Gamble broke his right arm while playing with the calves in his father's barn. He was taken to Didsbury for medical attention. Grace and Bob Stevens accompanied him.

Andy McCormick will have a stiff hand, resulting from crushing it while logging for John MacDonald.

Hale Gochee has his saw mill on Percel Blain's place. There will be 75 000 ft. at this set. Albert Kjosvick has his mill a mile and a half south.

WEEKLY JOKE

During a political campaign in America a candidate strode into a newspaper office.

"Look here," he cried, "you've been printing lies about me in your paper!"

"That's right," replied the editor, "I know it, but what would you do if we told the truth about you?"

Resumes Control of Rosebud Flour Mill.

Mr. M. Weber has again taken over the full management of the Rosebud Flour Mill and has put the mill in good shape, a trial run of flour milling having been made this week.

During the past five years the mill was leased to Mr. Simon Megli who operated the flour milling and feed grinding department. Mr. Megli has returned to his farm at Sunnyslope.

Scout and Cub Corner**1st Didsbury Troop Scouts
1st Didsbury Pack Cubs**

Five Tenderfoot scouts were invested by Scoutmaster Al Thomas on Friday evening last in the Legion Hall, and received badges, as follows: Scouts Ralph Edwards, John Mayerchuk, Lloyd Erb, Roy Reiffenstein and Willie Newton.

Saturday evening Mr. Charles Mardon held an instruction class on Morse and Semaphore flagging, while on Monday evening of this week Dr. Clarke conducted his third lecture on elementary first-aid and instructed the boys in the different kinds of fractures, how to care for each one and how to treat such in an emergency case before the arrival of a doctor. The next first-aid lecture will be given Monday next at 7:30 p.m. in the school. The next instruction class in flagging will be held this Saturday evening in the School.

Trail Riders Plan Perfect Mountain Holiday

THE Trail Riders of the Canadian Rockies have an unusual holiday tidbit set aside for the end of July when they will make a five-day exploratory trip through the picturesque section of the Rocky Mountains northeast of Banff.

The society, which was organized to open new trails through the mountains and give members an unrivalled mountain holiday at the lowest possible cost, has made many interesting trips in the past, but few with more promise than this year's from July 29 to August 2. They will ride over high passes and down into deep valleys in the shadow of 10,000-foot peaks; they will find time for fishing, or camera studies of the beautiful scenery or the big game which is found in such large numbers; they will enjoy campfire sing-songs and a bang-up Pow-wow at the end of the trip. These outings have become so popular that many Americans plan their holidays at Banff Springs Hotel, Chalet Lake Louise, or any of the several attractive bungalow camps every year to coincide with the official Trail Ride or Trail Ride.

It is a trip which will attract the novice rider as well as the experienced horseman, for the horses used are mild, sure of foot, and easy to handle. Experienced guides, cowboys, and cooks will be along to smooth the trip, while arrangements are well under way even now for the Trail Riders to find a comfortable camp and a warm meal waiting at the end of each day's ride. Two nights will be spent at one of the camps—the one nearest to the best fishing and most spectacular scenery.

Interest in this year's outing is keen, according to J. Murray Gibbon, Windsor Station, Montreal, the secretary-treasurer, who said that he expects there will be many new members in the party leaving the Banff Springs Hotel for the start of the ride on July 29. Photographs show scenes from the rides of former years and clearly indicate the joys of the mountain trails.

WORLD HAPPENINGS BRIEFLY TOLD

For the second time in two years, the Duke of Windsor has bought a Canadian-made car. It was shipped to him recently in France.

Elizabeth Seifert, of Moberly, Mo., mother of four children, has been awarded a prize of \$10,000 for her first novel, "Young Doctor Galahad."

H. W. Von Engel, German pilot, landed at Caravelas, Brazil, after a flight from England, breaking the long distance world record for straight flight by seaplane.

The Dominion government should refuse to permit any more orientals to take up permanent residence in Canada, Premier T. D. Pattullo said in a public address at Victoria.

Baron Ashburton, 71, a noted yachtsman, died of a heart attack, on the liner Queen Mary, returning from a two months visit to New York.

Premier Milan Hodza assured his nation that "Czechoslovakia is stronger to-day than before the central European crisis," precipitated when Germany annexed Austria.

A joint advisory conference is to consider transfer of the British protectorates of Bechuanaland, Swaziland and Basutoland to the Union of South Africa.

The Turkish government has agreed to the appointment of Franz von Papen as German ambassador to Turkey. Von Papen was minister to Austria until its absorption into Germany.

President Roosevelt said the United States proposal to give asylum to political refugees in Germany and Austria also applied to oppressed minorities in Russia, Spain and Italy and any other country abroad.

Baron Shu Tomii, counsellor of the Japanese embassy in London and one-time consul general at Ottawa, has been appointed minister to Canada. Baron Tomii, who succeeds Sotomatsu Kato, served as consul general at Ottawa in 1927 and first secretary to the legation in 1928.

Must Have Sixth Sense

Hohenzollerns Appear To Possess Art Of Self-Preservation

Nothing has been more remarkable since the advent to power of the Nazis than the way in which the ruling families of Germany have kept out of the limelight. The Hohenzollerns disappeared from view after November, 1918, when the Emperor William ingloriously bolted into Holland. The Nazi revolution in 1933 found them encouraging that movement. They welcomed it and have served it. A long family history of kingship seems to bestow a sort of sixth sense upon its members—that of self-preservation. This was never better illustrated than by the way in which the Hohenzollerns have allowed the Nazi flood to roll over them. They have given it lip service; there has been no murmur from them of revolt against either the religious or any other persecution. They are waiting, watching. Sometimes there is a panic. On February 3, when Herr Hitler was striking right and left, the ex-Crown Prince William bolted across the frontier, forgetting even his passport. This was explained away. It is the one mistake the Hohenzollerns have made since the rise of Hitlerism. They have now gone back to their attitude of waiting and watching, with the air of people who are certain that in the end—after the next military disaster, perhaps—things will come their way.—National Review, London.

A Risky Business

A pedestrian crossed a traffic-filled street while looking up at an airplane overhead. Three buses shaved him so closely that his beard didn't appear again for a week, the wind from six passing cars raised the nap on his last year's suit, one five-passenger car removed the shine from the back of his left shoe, and the drivers of seven other assorted makes, while stripping their gears in an effort to avoid him, also stripped their vocabularies of every known high-powered adjective.

After stumbling over the curbstone on the farther side of the road, the pedestrian was heard to murmur: "My gracious, those airmen lead dangerous lives."

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

SKATING, HOCKEY, CURLING 24 HOURS DAILY AT FLIN FLON

But you never realized that a splendid rink with ice sheet 80 x 100 and seating capacity of 1,500, the only steam heated rink in the West, is to be found at Flin Flon, Manitoba, 580 miles north from Winnipeg. There it is, built in the winter of 1934-35 on the same plans as the Hamilton, Ontario, rink, of corrugated iron at a cost of \$23,000, one-third by popular subscription and two-thirds by the Hudson Bay Mining & Smelting Co. Now its value at \$26,000, on account of recent additions.

Skating starts first week in November and closes first week in April, but no money is spent on artificial ice equipment, the thermometer outside registering 40 below, but inside all is comfortable.

Flin Flon last year entered in the Northern Saskatchewan League with North Battleford, Prince Albert and Saskatoon. North Battleford beat Flin Flon in the league race and then went on to be runner-up in the Allen Cup trophy competition. This season Flin Flon won the northern title from Saskatoon and in the play-off with Moose Jaw, representing the southern league, Flin Flon won the Saskatchewan championship. So good hockey is played in Flin Flon.

Curling, too, flourishes in an extension to the rink. There are six sheets now, with five extras in the skating rink during bonspiels.

The curling rink works 24 hours a day here because miners come off shifts at all hours and compete with town rinks and other sections of the plant. There are also quite a few ladies' rinks and some school children's, but the big event is the annual bonspiels for visiting curlers at the end of the season.

Last winter 288 curlers were engaged, being 28 outside rinks and 44

local, and it took a week's work, night and day, to play through the various competitions. What a heaven for a curler.

"FLIN FLON"

The Town That's All Lit Up!

Don't get me wrong on this. I mean the electric lights are never turned out, night or day, on the streets. Some day they may be when the electric company can catch up with the growth of the town, but at present they can't stop to figure out switches, etc., and it's cheaper to let the lights burn.

Surprisingly quiet and well behaved is Flin Flon. Of course restaurants run 24 hours a day be-

cause miners are always going off or coming on shifts, and meals must be provided. But other stores shut promptly, even on Saturday night, at 10 o'clock, and they really shut!

Crime is hardly known in the town, the worst of late being the disappearance of three saxophones, and many readers will say—that's no crime.

Hospital, excellent schools, skating and curling rink, community halls, etc., are largely due to the town authorities and the Hudson Bay Mining & Smelting Co., the owners of Flin Flon. They are looking to the future because it seems there's enough ore on hand to run another 20 to 40 years.

Curling and skating rinks at Flin Flon—heated and lighted by electricity. Something doing every hour of the 24—believe it or not!

The Main Street at Flin Flon, Manitoba—paving is expected soon. The tar sands of Alberta may be used in a mixture.

Gardening

For best results grass seed must be sown in the cool weather. This means, according to the experts, that all lawns or lawn repair work must be made well before the first of June. At this time there is usually plenty of moisture and nights are cool. Success lies in the selection of the highest type of seed. There are all kinds of qualities offered, but the best blends for permanent results prove least expensive. In Canada there are laws governing grass seed but these have been designed only to protect the inexperienced from getting a lot of weed seeds instead of grass.

With new lawns, the spade work should be done as early as possible. The main thing is to get the ground level. After digging or plowing, the ground should be allowed to settle for a few days at least, and then levelled again. If there is time, it is advisable to repeat this process several times. The top soil should then be raked fine and on a windless day the grass sown at a liberal rate, once across and once lengthwise. This double sowing insures an even distribution. In covering, the gardener is advised to rake one way only and then firm the soil with a heavy roller or pounder. The first cutting of the grass is made when about three inches high and should be done with a very sharp mower. Frequent rolling when the ground is soft, regular mowings, and an annual application of good lawn fertilizer is advisable.

Even with a very small garden, there is a big advantage in having a few perennial flowers. With these there is something to build the rest of the garden around and there are less likely to be long blank periods when there is no bloom available. About a dozen different kinds will make a fair foundation. Here is a fair selection:

Delphinium	Hardy Chrysanthemum
Phlox	Iris
Hollyhocks	Oriental Poppies
Lilies	Dianthus
Trollius	Peonies
Yucca	Columbine

Seed catalogues put out by the large firms contain much more than a mere mention of the many flowers and vegetables available in Canada. They specify important points such as time of planting, resistance or lack of resistance to frost, height, color, season of blooming, whether scented, and also the suitability of the flower for cutting purposes. All of these points should be taken into consideration in planning a real garden, as only with such knowledge can a comprehensive and practical scheme be worked out.

Believe It Or Not

Anders Sorensen, Denmark's oldest bachelor, has died in Horsens at the age of 103. When asked on his 100th birthday the cause of his long life, Sorensen replied: "The only reason for my being this age is because I have never married." 2249

Lived To Great Age

Arabian Prince, 108, First Came To America In 1876

Prince Hadji Tahar ben Mohammed ibn Saud Wahabi, of Arabia, a son of the late Emir of Nejd, died in Roosevelt Hospital, New York, after an illness of two years. He was 108 years old.

A daughter, Miss Gazelle Ali of 343 West Fortieth street, exhibited proof of his years by producing a card which attested his age as 47 in 1876 when he made his first visit to the United States to take charge of the Oriental exhibition at the Centennial Exposition in Philadelphia.

In that year he arrived with a troupe of 75 acrobats, dancers and horsemen. They made the voyage in an Arab sambak, the journey taking three months.

Since then he had passed considerable time in America. He was in charge of construction of the Oriental city at the Chicago Fair of 1893 and was retained in a similar capacity for the Century of Progress fair in 1933.

He often attributed his long life to early contact with the hot sun and sand of Arabia. "When I was a young boy," he once recalled, "I was forced to run naked across the desert until I dropped from fatigue. It must be a healthy training for many of my compatriots who endured the same ordeal in their youth have lived to an age as great as mine."

Will Visit Saskatchewan

Lord Tweedsmuir Is Planning Trip About Middle Of May

Lord Tweedsmuir, governor-general of Canada, is to spend nearly a week in Saskatchewan about the middle of May. He is expected to pay a visit to the University of Saskatchewan on May 9 or 10, spending a day in Saskatoon.

Following his university visit His Excellency will swing south to Swift Current where he expects to spend two or three days looking over the farm rehabilitation work in that part of the province.

From Swift Current His Excellency will proceed to Regina, arriving on May 13 or Saturday, May 14.

According to present plans received at the University of Saskatchewan Lord Tweedsmuir's visit to Regina will be but a brief one as he expects to leave for the east on Sunday, May 15.

A new gold field has been discovered in British Guiana.

SELECTED RECIPES

THE QUEEN'S ORANGE CAKE

Temperature: 325 degrees F.

Time: 45 minutes

$\frac{3}{4}$ cup pastry flour

$\frac{1}{4}$ cup sugar

$\frac{1}{4}$ cup orange juice

$\frac{1}{4}$ cup sugar

Grated rind of 1 orange

4 egg yolks

$\frac{1}{2}$ teaspoons baking powder

$\frac{1}{4}$ teaspoon salt

$\frac{1}{4}$ cup Benson's Corn Starch

4 egg whites

Sift flour, Benson's Corn Starch, baking powder and salt together. Beat egg yolks until light; add $\frac{3}{4}$ cup sugar gradually, beating thoroughly. Add the orange rind and juice. Fold flour mixture into egg yolks a little at a time. Beat egg whites until stiff; add $\frac{1}{4}$ cup sugar, fold into batter. Bake in layer cake pans which have been lined with waxed paper. Put layers together with orange cream filling and ice with orange icing.

Orange Cream Filling

1 egg yolk

2 tablespoons sugar

2 tablespoons Crown Brand Corn Syrup

Grated rind of $\frac{1}{2}$ orange

2 tablespoons orange juice

1 teaspoon lemon juice

$\frac{1}{2}$ cup cream, whipped stiff

Mix first six ingredients thoroughly. Place in saucepan and cook until thick. Chill and combine with the whipped cream.

Orange Icing

Grated rind of $\frac{1}{2}$ orange

$\frac{1}{2}$ teaspoon grated lemon

$\frac{1}{2}$ teaspoon lemon juice

2 tablespoons orange juice

1 tablespoon butter

1 tablespoon Benson's Corn Starch

1 tablespoon Crown Brand Corn Syrup

Few grains salt

1 egg yolk

$\frac{1}{2}$ cups icing sugar, or more if needed

Add orange and lemon rind to the fruit juice. Let stand 10 minutes. Cream butter, add egg yolk and salt. Beat until light and fluffy. Add juice and Crown Brand Corn Syrup; sift together the icing sugar and Benson's Corn Starch and add until of the right consistency to spread.

Always Well Paid

The best paid occupations in this generation are the movies, pugilism, baseball, hockey, rugby and jockeying, and no university training is essential for any of them. No wonder the young people want to get out of school as quickly as possible in order to indulge in sport training, says the Guelph Mercury.

He (after being turned down): "I'm not worrying; there's a lot more fish in the sea."

She: "Yes, and if nobody's got a better line than you have they'll all stay there."

Health LEAGUE of CANADA

presents TOPICS of VITAL INTEREST

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 107 Bond St., Toronto, Ont.

Develops Coronation Lily

Ottawa Woman Is Famous For Her Work With Flowers

Fit for a king is the golden Coronation lily developed by Miss Isabella Preston, specialist in ornamental horticulture at the central experimental farm, Ottawa.

This lily, whose wide golden petals curl back to bare long golden stamens, blooms in clusters of 15 to 20 at the top of a three-foot slender green stem. Born in 1935 of the second generation produced by crossing two orangey varieties, Willottiae and Dauricum seedling, Coronation is a sister to the five hybrids produced by the first crossing, which bear the names of stenographers in the horticultural division.

Miss Preston has won wide acclaim for her work with lilies. Before joining the experimental farm at Ottawa, in 1920, she made many discoveries during her nine years' service at the Ontario Agricultural College, at Guelph, Ont. She believes the lilies are her most outstanding scientific discoveries, but actually the Prestoniae, a pinky-mauve lilac produced in 1920 by crossing purple varieties of Villosa and Reflexa, is the most useful contribution towards garden ornamentation.

A hardy type of rose, enabling flower lovers in every part of the Dominion to include this favorite posy among their garden bouquets, is the next feat Miss Preston hopes to accomplish. Some interesting single-blossom shrubs have been produced, which are being tested for hardiness and will be available for distribution soon.

Belgium Defences

Testing Precautions Against Any Threat From Hostile Forces

Vigilant Belgium tested both her first line and reserve defences against any threat from the disturbed international situation.

The Seventh Reserve Division manoeuvred before the Defence Minister and Chief of Staff at Bexeloo camp in northeast Belgium according to plans worked out last January.

Military authorities turned their attention to the Luxembourg border defences. The neighboring Grand Duchy is unarmed.

Foreign press correspondents visiting the famous fortresses of Liege saw how intervals between the advanced forts were protected by miles of barbed wire and mobile defence units.

This system is intended to prevent infiltration of a hostile force between the forts, as happened in 1914.

Has Radio On Bicycle

Harley Her, 16-year-old Amer youth, listens to his favorite radio programs as he rides his bicycle a five-mile distance daily to attend high school at Kingsville, Ont. His wheel is equipped with an old, but efficient battery set, earphones and all.

"It's pitiable to see so many weak-willed men about. I believe in being master in my own house."

"Quite so! How long will she be away?"

In Moscow, several families, as a rule, share a community kitchen in which they do their cooking.

Tobacco was discovered in San Domingo in 1496; afterwards by the Spaniards in Yucatan in 1520.

JOYS AND GLOOMS

MANY PEOPLE can safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one

month. Then, if you do not feel better, return the Postum container top to General Foods, Limited, Cobourg, Ontario, and we'll refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

DON'T BE A GLOOM—DRINK POSTUM!

WHAT HO!

—By—
RICHARD CONNELLBy Arrangement With Thomas
Allen, Publisher, Toronto.

CHAPTER IX.—Continued

His one crumb of comfort was the thought that to be killed in action in the hunting field was a fate becoming a Bingley. He had seen in the village churchyard the tombstones of a number of the tribe who had died with their riding boots on. Would he lie beside them, he wondered, or in the grave in the lower garden Crump had dug for Elaine? These macabre speculations occupied his mind until he saw, looming large ahead of him, Lester's Wall. To Ernest it looked as high as the Great Wall of China.

He did the only thing he could do, which was to shut his eyes, hold his breath, and pray. He felt the rush of air as he rocketed through the atmosphere like a space-ship bound for Mars. There was a thump and thud, and he opened his eyes. He was not surrounded, as he had expected, to be, by cherubim and seraphim, or even by doctors and nurses. He did not smell a celestial aroma, or the ether-carbolic perfume of a hospital, but only the clean, invigorating, morning air; and he discovered that he was still aboard Fin McCool, and that Lester's Wall was behind him.

His success in surmounting the wall went straight to Fin McCool's head. Drunk with power, he decided to abandon the pursuit of the fox and devote his day to jumping all the walls in that part of the country.

Off he went, at a tangent, and Ernest went with him, part of him and yet not exactly part of him, like a loose nut on a flivver.

The hunt went north and Fin went south. No chart of his course exists. Ernest never knew where he went. All he knew was that the walls came too quick to count. Fin would rush at them, careen over them and rush on, seeking new walls to conquer; or, if he liked a particular wall, he would wheel around and jump at it

again; but at no time did he slacken his pace enough to permit Ernest to slip to the ground, and, by the time he had negotiated his seventh, or perhaps seventeenth wall, Ernest was too numb for voluntary motion.

It is certain that Fin circled back and once more jumped Lester's Wall! for the Earl of Bingley, smoking a pipe on the spot near the wall where his mount had painlessly deposited him, was an astonished eye-witness. Country-folk rubbed their eyes at the sight of a big horse, possibly spectral, jumping back and forth over their walls. The ride of Ernest Bingley passed into Somerset folklore and took its place in legend beside the rides of John Gilpin, Paul Revere and Sheridan.

Fin McCool, having proved to the world and himself, that the dreaded Lester's Wall was a mere hummock to a leaper of his talent, roared on at a dizzy pace in search of bigger and better walls. He scented somewhere beyond Lester's Wall an obstacle worthy of him, and he raced through Kingsley's Copse with his throttle wide open.

It was a thick coppice, bearded with underbrush and studded with trees and not at all an ideal bridge-path, but Fin McCool ploughed through it like a love-sick moose late for a tryst.

In the exact centre of Kingsley's Copse, Ernest severed his association with Fin McCool. Their parting was sudden and final. A low hanging limb on an oak tree scraped Ernest off as neatly as a waiter brushes crumbs from a table cloth. Fin streaked on his merry way like a streamline express on a record-breaking coast-to-coast run. Ernest was left dangling in mid-air the way a train leaves a mail-bag on the crane of a village depot.

He scrambled up on the limb, which was as thick as the thigh of a wrestler, and perched there, trying to capture his lost breath and bearings. Far in the distance he heard the cry of the hounds. It seemed to be coming nearer. The fox must have doubled on its tracks. Ernest decided to copy the cat in the fable which demonstrated that a tree is the safest place to be in during a fox-hunt.

The hunt swept by, skirting the edge of the copse, and through the leaves he could see the color of their coats as they flashed past like a cavalcade of flamingoes.

Then, through the brush, came crashing a horse. Ernest's legs tightened in a scissors-hold on the tree-limb, for he thought it was the pertinacious Fin McCool coming back to get him. Then he saw that it was a horse of a different color, a runaway which had bolted from the hunt and was charging along pell-mell heedless of the fact that dead ahead of it lay a deep and rocky ravine. The runaway's rider had flattened down close to the animal's neck to escape the boughs.

As the horse passed directly under Ernest, his hands shot down in a desperate grab and clutched curls. He somehow kept his grip and drew the squealing rider up to the limb beside him.

It was Lady Rosa, and for a moment she clung to him, trembling and making little frightened sounds. "There, there now, Rosa," said Ernest, "you're all right."

She pulled herself together quickly. "Yes, I'm all right," she said.

"But what about Galahad?"

"Your horse?"

"Yes."

"He is all right, too," said Ernest.

"He swerved just before he got to the gully."

"Where is Fin McCool?"

"In London, by this time. Or Scotland."

"What are you doing in this tree?"

"Resting."

"Oh, Ernest, are you hurt?"

"Only my pride," he replied.

"Mine, too," said Rosa. "I can't think what got into old Galahad to make him run amok like that."

"Probably he was corrupted by Fin McCool," suggested Ernest.

"Shouldn't wonder. Whatever it was, he got out of control and here I am."

"So am I," said Ernest.

"Just like a couple of monkeys."

"An ape and an angel," said Ernest. It was the most inspired speech of his life.

"Not an ape," Rosa said. "A lamb."

"A black sheep, I'm afraid," Ernest said. "If I was in disgrace before, what am I in now?"

"I shouldn't worry about that," said Rosa.

"They'll laugh at me," said Ernest.

"I'll be a joke for them to titter and sneer at. That clumsy American! That dumb cluck of a Yank!"

"I'm in disgrace, too, you know," she said.

"You? Why?"

"It's not considered good form for a Bingley to ride as abominably as I did to-day. Esme will be furious at me."

"Esme can go to blazes," said Ernest.

"Why, Ernest, I never saw you look that way before."

"What way?"

"So stern and savage."

"I'm sorry," said Ernest. "No, I'm not. I'd like to see Esme chased by seventy foxes."

Rosa laughed.

"It would make a pretty picture," she said.

"I suppose we'd better climb down and start back to the castle," said Ernest. "I hate to go, though. I guess I'll just sneak in the back-way and hide in my room."

"What? And miss the ball?"

Ernest nodded gloomily.

"Let me help you down," he said.

"Not yet. There's something I must tell you. I've had more comfortable seats than this tree, but at least we are alone here."

Her serious tone made him regard her anxiously.

"I hate a faker," she said.

"So do I," said Ernest, dreading her next words.

"I mean a man who pretends to be something he isn't," she said.

Now, thought Ernest, it's coming. He waited.

"Will you give me an honest answer to a plain question?" said Rosa.

"I'll try to, Rosa."

"When did you last ride to hounds?"

"To-day."

"I mean before to-day."

"Well, now, let me think," began Ernest.

"You needn't," she said. "I know the answer. It is 'Never.'"

He did not look at her.

"Lots of people never have," he said.

"Have you done much horseback riding?"

"It depends on what you mean by 'much.'"

"Please don't quibble. How many times have you ridden?"

"Well," said Ernest, "there was Ralph."

"I meant on a horse. He's an omnibus."

"There was Jacob."

"A jumper?"

"No," said Ernest, and he grew defiant. "Jacob was just a fat old plow-horse and I rode him in a pasture three or four times when I was ten, and my grandfather held me on at that. And that's all I've ever ridden in my life."

"You let us think you an experienced horseman."

"Sure I did," said Ernest. "I tried to fool you. And I got caught at it."

"Why did you hunt to-day? Don't you know it was a most foolhardy thing to do?"

"No long-legged lummock can call me yellow and get away with it," said Ernest.

"So that's why you risked your neck?"

"That—and another reason."

"What other reason, Ernest?"

Ernest picked an oak leaf and crumpled it in his hand.

"I wanted to make a hit with somebody," he said. "Back home we'd call it showing off."

"Whom did you expect to impress?"

"Never mind," said Ernest.

"You needn't act so kittenish, Ernest," Rosa said. "I know you mean me."

He looked at her now.

"Yes," he said, "I mean you, Rosa."

She plucked an oak leaf and began to twist it with her fingers.

"Oh, I know I flopped," went on Ernest. "I know I'm what you hate—a sheep in wolf's clothing."

"I don't hate you, Ernest," said Rosa.

"You despise me then," said Ernest, "and that's worse."

"I don't despise you," said Rosa. "I admire you."

"But how can you?"

(To Be Continued)

Perfect Imported Egg

Consumer in England Thinks Canada Has Produced It

Canada claims to have produced, after years of research and experiment, what is from the point of view of the consumer in England the perfect imported egg, says the Irish Independent. The first consignment of these eggs has just arrived in London—750 dozen—and they will be distributed to experts in various parts of the country, from whom opinions will be gathered. The housing and feeding of the poultry have been minutely watched, the eggs have been graded and tested, they have been sent over in special chambers kept at a fixed temperature and watched by vigilant C.P.R. officials, and they are being handled on this side with all the care usually bestowed on the most precious cargoes.

Five Years' Work

Australian Made Four-Foot Model Of Empress Of Britain

An opportunity to check the details on his four-foot scale model of the Empress of Britain was presented to H. W. Eaglesham, of Sydney, Australia, when the giant Canadian Pacific flagship steamed into port there for the first time in her career.

For five years the Sydney engineer has been "tinkering" with odds and ends of cardboard, wood, glass and celluloid and the result is an almost perfect replica of the 42,350-ton vessel built on an exact scale, one-sixteenth of an inch to a foot.

Into the construction of the model went dance tickets, menu cards, dinner invitations, cigar boxes and such. The hull frame is made of cardboard and onto it are glued the "plates", erstwhile menus and invitations. There are 1,000 glass port holes in the hull and 600 square celluloid windows in the super structure.

Over 9,000 separate pieces of cardboard went into the job altogether and 100 of these were used to build the wheelhouse which is fitted with panelled doors. Funnels, lifeboat davits, decks and deckhouses are of cardboard, while lifeboats are of cedar and both wood and cardboard form the deck fittings. At night Mr. Eaglesham illuminates his model with interior lights.

Advice Is Valued

Admiral Sir Lionel Halsey Is Courtier In Royal Household

Sixty-six years old the other day, Admiral Sir Lionel Halsey is still an active courtier in the Royal Household. The King greatly values his advice and wisdom.

From long association with the work of the Duchy of Cornwall he has a great knowledge of it, and usually accompanies King George when Duchy interests are involved.

Sir Lionel joined H.M.S. Britannia in 1885. His first royal contact came eight years later, when he was appointed to the royal yacht. He was at Ladysmith where for special services he was promoted; in the Heligoland, Dogger Bank and Jutland battles; and was chief-of-staff to the Duke of Windsor, as Prince of Wales, during two tours. Eventually he joined the Prince's household as Controller.—Overseas Daily Mail.

In a new method of cleaning railway coaches in Potsdam, Germany, the cars are placed in an enormous boiler and given a Turkish bath.

Food cannot be turned into living tissue successfully without sleep.

LOCAL & GENERAL

Miss Dorothy Ranton was a visitor in the southern city on Friday.

The regular meeting of the Canadian Legion will be held this Saturday evening. "On the Town."

Miss Margaret Ranton, Lacombe, is spending the vacation with her parents, Mr. and Mrs. E. G. Ranton.

Miss Annetta Sheils is practicing teaching at Poplar Creek School this week.

Mrs. W. Morrow, of Calgary, spent the weekend visiting her parents, Mr. and Mrs. H. M. Reiber.

Seth Halton visited his brother Jim this week, while on his way from the University at Edmonton to his home at Pincher Creek.

Delmar Foote, who had been attending Mt. Royal College, is spending the summer vacation with his parents, Mr. and Mrs. A. H. Foote.

Dr. Clarke motored to Edmonton on Saturday and was accompanied home by his daughter Lorna who had been attending University.

Piano tuning.—Gavin Spence and Virgil Goulson will be in Didsbury the week of May 1st. Leave orders at Pioneer office.

Mr. Art. Reiber is spending the summer vacation at his parental home, having completed his course at the University at Edmonton.

Amateur Night at the Community Hall under auspices of the Mt. View Women's Institute, Friday, May 20. Adults 35c, children 15c, family ticket \$1.

Here's a weekend special at T. E. Scott's.—Men's dress shirts, regular \$1.25 and \$1.35, to clear at \$1.00.

The Evangelical Young People will present a three-act play "An Old Fashioned Mother" in the basement of the church this Friday evening. There is both pathos and humor in this play and you will enjoy it.

Married—at Calgary on Friday, April 22nd, Mildred Winifred, the eldest daughter of Mrs. J. MacDonald to Mr. Lyle Munro. They will reside on the farm east of town.

K. Roy McLean, optometrist and optician 209-210 Southam Building, Calgary, will be in Didsbury at the Rosebud Hotel Monday, May 2nd, morning only.

Jeanette MacDonald and Nelson Eddy, a cast of 2,000, a male chorus of 60 renowned voices and a giant symphonic orchestra, all come to the movies this weekend in "Maytime."

Four Didsbury youths, Russell Carleton, Hugh McGhee, Gordon Caithness and Albert Dedels, had a narrow escape Wednesday last when they were hitch-hiking to Innisfail. They got a ride with a car from Camrose and when they were between Bowden and Innisfail the car in which they were riding collided with a truck. Russell Carleton received a severe cut in the forehead, but the other boys escaped with a shaking-up. The car and truck were both badly damaged.

A good heavy work boot with Panto sole and all-rubber heel.—Only \$29.95 from T. E. Scott.

Mrs. Ray Wood won the car which was given for the "Twin Contest" conducted by the Albertan. Mrs. Wood is to be congratulated as she was the only one out of over 9,000 contestants to have the twins paired correctly. Mrs. B. Ryan also was successful in the contest, winning a prize of linen.—Carstairs News

Men, how about buying your summer underwear from T. E. Scott?

Remember Mother on Mother's Day, Sunday, May 8th.—Cards, chocolates, flowers and plants, at Chambers' Drug Store.

Special—A 60-cent bottle of liquid veneer polish for 25c at the Drug Store.

SNAP
THE GREAT
Hand Cleaner

Honor Dan McCowan

DAN McCOWAN, author and naturalist who delights visitors to Banff Springs Hotel with lectures on the wonders of the Canadian Rockies, has been made a Fellow of the Zoological Society. The honor was conferred on him after he delivered an illustrated lecture before the society at Regent Park on his last visit to England. "My job is a perfect one for a canny Scot," he often says. "I can sell scenery to visitors and keep it too."

Calf Club Holds Annual Meeting

The sixth annual meeting of the Didsbury Dairy Calf Club was held Friday evening last in the basement of the public school.

There was a good attendance and all enjoyed a short talk given by the field supervisor, Mr. McPhail of Olds.

Following are the newly-elected officers:

President, Harvey Stevens.
Vice-President, John Bruce.
Sec.-Treas., Marion Levagood.
Overseers, Messrs. Harold Brennan and Hugh Roberts.

All members are urged to obtain their prize money from Mr. C. E. Reiber at his office during the coming week.

Anyone wishing to become a member of the club should get in touch with either the president or secretary.

Evangelical Church Notes.

The pastor will speak from the subject of "Stewardship" next Sunday morning. The evening theme is "Assurance of Soul Salvation."

You need these messages—and the Church needs your presence.

At the Movies.

"Maytime," the Gorgeous Melody of a Whole Generation—
With Tender Romance and Beauty

Hollywood's spectacular musical picture, Metro-Goldwyn-Mayer's "Maytime," will delight Opera House patrons this weekend.

With the glamorous Jeanette MacDonald and the picturesque Nelson Eddy reunited in the starring roles, this extravagant adaptation of the stage musical is far more beautiful than the original. That is to be expected, of course, owing to the greater resources of the screen.

Miss MacDonald and Eddy surpass their starring performances in those brilliant pictures, "Naughty Marietta" and "Rose Marie." John Barrymore is excellent in the character of Nicolai, temperamental and tragic impresario, while a delicately beautiful young singer from the Kentucky Blue Grass regions, Lynne Carver, sings and acts unusually well. She and Tom Brown provide the juvenile romance in the story.

How many times in your lifetime have you heard "Sweetheart, Sweetheart, Sweetheart, Will You Love Me Ever?" Dozens! This great number, biggest hit of the original musical score from "Maytime"—a number that has been sung and loved the world over—is the song hit of the picture. To oldtimers in the audience it will recall forgotten incidents in their courtship days. The newer generation which has sung it around pianos, and thrilled to it over the air, will really appreciate for the first time its tender beauty and sentimental appeal when it is so gloriously sung by MacDonald and Eddy.
